Thank you for your interest in our female offerings. They represent forty-four years of complete A.I. breeding, along with embryo transfer using the breed's best genetics. You will find all our females have enhanced EPD information from the result of DNA evaluation. Breeding information will be verified prior to sale date. All cattle are complete and up to date on their vaccinations and are ready to go to grass. There are three auctions represented in this catalog. For videos and more information, visit our website prior to the sales.

Thank you, Buddy

The following registered females are offered in the

G&E Premium Assured

Heifer Sale

Saturday, March 28, 2026

12:30 p.m.

G&E Farms Sale Facility

Gretna, Virginia

1/2 mile south of Route 40 on Business 29

(100 Floyd Bennett Road, Gretna)

Also selling approximately 120 commercial bred heifers and some pairs. These heifers adhere to the rigid genetic, health and reproductive standards of the branded Virginia Premium Assured Program. They are heavily influenced by Shelton Angus genetics and our Select Sires affiliated A.I. service.

*Internet bidding available through COWBUYER.

WHS Capital

20101915

Sire of 17M, 78M, and 124L

CED	BW	WW	YW	DOC	MILK
+11	+1.7	+94	+168	+23	+24
HS	MARB	RE	\$M	\$B	\$C
+68	+93	+55	+83	+181	+318

Capital was Alta Genetics' selection from our 2021 bull sale. He sires growth, base width, and depth of body as consistently as any AI sire we use. His dam, WHS Surefire Burgess F19, is now a featured donor at Craven Angus in North Carolina.

GAR Wallace

20617150

Service Sire of 78M

CED	BW	WW	YW	DOC	MILK
+13	-.7	+95	+164	+21	+36
HS	MARB	RE	\$M	\$B	\$C
+38	+2.34	+1.09	+97	+240	+408

Named after the Select Sires beef program legend Roy Wallace, this is the most intriguing GAR bull in years. This big spread Jameson son has elite marbling potential and excellent foot quality projections. Semen is limited and his first progeny will see high demand.

Bear Mtn North Star

20474708

Sire of 19N

CED	BW	WW	YW	DOC	MILK
+12	-1.1	+73	+137	+25	+23
HS	MARB	RE	\$M	\$B	\$C
+12	+1.40	+83	+65	+193	+315

This Genex calving ease sire offers an outcross pedigree for us. DOCILITY and HAIR SHED are excellent. Our first calves will be at the top of their weaning contemporary groups.

46M

WHS Winchester Blackbird 46M

21295712 09/22/2024

Sire: Poss Winchester

MGS: CTS Remedy 1T01

MGGS: G A R Prophet

HS	HP	CEM	MILK	MW	MH	CW	MARB	RE	FAT
2	41	85	14	41	76	48	8	6	16

Bred Heifer Excellent heifers come from great cows and 46M definitely illustrates this. Her Remedy dam is the definition of a Pathfinder cow with progeny ratios of 6/108 WW, 6/107 YW, 3/124 IMF, and 3/101 RE. This Winchester daughter is double digit CED and negative BW with top 25% yearling growth. She is thick and wide based in a sustainable frame size package and is extremely square hipped and sharp fronted. Strong DNA percentiles give her breed leading carcass quality projections, and she is the only animal we have ever tested that is top one percentile for tenderness. Excellent Hair Shed and Milk EPDs round out this potential donor's resume. Her Pursuit pregnancy should be a valuable commodity at this time next year.

Top 20% CED, 20% BW, 15% Milk, 15% HS, 15% Marb, 15% RE, 15% Fat, 20% \$B, and 20% \$C.

Due 9/11/26 to Poss Pursuit.

78M

WHS Capital Burgess 78M

21295725 09/23/2024

HS	HP	CEM	MILK	MW	MH	CW	MARB	RE	FAT
75	71	86	10	7	8	2	29	16	66

Bred Heifer This 6-frame Capital daughter is the performance leader of her contemporary group of females posting ratios of 112 for both weaning and yearling. 78M is about as deep bodied as any yearling heifer we have ever made and is very sharp fronted and attractive from the profile. Single digit DNA percentiles for weaning and yearling growth, along with her individual performance, calculate breed leading EPDs for these traits. This heifer comes from a solid Bronc daughter that has weaned four calves at a 104 ratio. At every interaction, 78M has shown her +31 Docility EPD to be accurate. Consider the genetic potential of the GAR Wallace pregnancy this heifer is carrying. The combination of these two could be phenomenal. Top 4% WW, 5% YW, 10% Milk, 4% Doc, 15% CW, and 3% \$W.

Due 10/21/26 to GAR Wallace.

L6

WHS Home Town Burgess L6

20991599 10/02/2023

21	38	22	6	79	65	8	24	34	40

Bred Cow Dam of 19N This two year old is the last progeny of a large Home Town flush from our Hoover Dam donor, and they have all been good. This young cow was too green in February for her picture to do her justice, but she is coming on strong and you will appreciate her on sale day. The proof of this young cow's merit is the North Star heifer at her side. Moderate BW spreads to excellent growth, and the maternal traits of high milk, udder quality, heifer pregnancy, and sustainable mature size are all here as well. The carcass traits we expect from the Home Towns are strong in L6. Not many females generate a slate of dollar values where \$M, \$W, \$B, and \$C are all top 5% or better. Top 20% WW, 20% YW, 3% Milk, 10% Teat, 15% Udder, 10% CW, 20% Marb, 4% \$M, 3% \$W, 5% \$B, and 2% \$C. **Due 9/15/26 to Stellflug Hoffman RiseAbove.**

22	49	36	26	57	51	25	8	16	27

Open Heifer The North Stars have been a very popular sire group in the last year because of their excellent phenotype and well balanced EPD profiles. 19N is very moderate for BW with considerably above average growth. She has a slate of EPDs with few extremes but no weak spots, which is very consistent in the North Star sire group. 19N is long spined and square hipped but remains very clean fronted. She has excellent EPD projections for Milk, Teat, and Udder. Both Marbling and Ribeye EPDs are over +1.00, which calculate strong \$B and \$C. There is a lot of cow potential in this young female. Top 15% Milk, 4% Teat, 10% Udder, 15% Marb, 20% RE, 15% Fat, 15% \$W, 15% \$B, and 15% \$C.

26	25	82	33	81	59	66	77	20	23

Bred Heifer This 6-frame Craftsman/Tahoe is a breed leader for growth being near +100 WW and over +160 YW. Her strongest appeal may be her maternal traits, which calculate a top 1% \$M and \$W. This is no surprise considering the proficiency of her dam, who has progeny ratios of 3/108 WW and 3/105 YW. It is unusual to find a Craftsman daughter that is +30 Docility, and there is not a proven pedigree combination more likely to make cows than this one. This gentle, long bodied, attractive heifer is definitely a donor prospect and has been a favorite since birth. Top 2% WW, 4% YW, 15% FL, 10% Doc, 10% Angle, 1% \$M, 1% \$W, and 20% \$C.

Due 9/11/26 to Connealy Cornhusker.

26	3	18	23	16	19	17	38	57	40

Bred Cow Dam of 121N L5 is a hardworking ET two-year-old with a little more stature and length of spine than the typical Top Cut. The Top Cut flush on our Growth Fund donor was very successful, with several of the bulls being favorites in our sale the last few years. L5 posts individual performance ratios of 109 weaning and 103 yearling. She is at the top end of the breed for growth EPDs and comes with positive foot quality projections and high-end Milk and Heifer Pregnancy. She will mature into a bigger than average cow and has put some extra frame size in her first Crosswind daughter. Her pregnancy by the +\$454 \$C PEAK Draft Pick is exciting. Top 10% WW, 10% YW, 15% HP, 15% Milk, and 10% \$W.

Due 9/17/26 to PEAK Draft Pick.

121N

5	23	3	20	4	18	29	20	17	29

Open Heifer 121N's DNA evaluation moved her to a breed-leading calving ease category, and this combined with over +150 yearling growth is extremely rare. She is a longer-bodied, larger-framed Crosswind that is extremely long-necked and feminine-fronted. Milk, Heifer Pregnancy, Docility, and Marbling are all here in this attractive female. Top 1% CED, 1% BW, 10% YW, 20% Milk, 15% DOC, 4% HS, and 20% MARB.
